

## A letter from Rugendabari, Rwanda

Dear Don and the friends from England Church,

We are very happy to greet you and to tell you about our vocational school. As we planned it, now, the action is started on 9<sup>th</sup> JAN, 2012. Now, we have 50 students:28 women and 22 men.

The courses are :carpentry, brick laying , sewing ,cooking, English and moral.

We want to show you our students and their teachers with those photos below.

This one is the photo of sewing school: Dominic standing is the teacher and she is explaining how to use sewing machine.

That is me watching what they are doing. Let me show you our classes and roof how it looks like.

Do you remember my little sons?? Those two boys are my sons in the photo. Those are others of sewing.

That is the classroom for carpentry. One of them is explaining on black board. I am standing beside the classrooms.

Students are rushing into the class. As you can see, those classrooms are very old for having been used as the primary school for long times. But a few years ago, it was closed. That is why we planned project of vocation training at those classrooms.

We use one room for practice of carpentry. As you see the tables of carpenter inside.

One standing on left explaining is the teacher of this course. Maybe, You could find me on the photo people are measuring and cutting the wood.

Pray for us, especially, for church. We need to complete our church and hopefully,

believe we could see that until end of this year.

Dear friends we thank God for your kindness as we have received a very good calendar from your church it makes my family happiness even in our Diocese . we have request of electric power ,because we need to add welding course in our courses next year and electronic plane.

We wish you the blessing of God, our parish greet you all.

**p.s. We have another request for salary of teachers ,we have three teachers and a guard for security.**
