

## FLIC Update

### **The Current Position:**

Praise God for the generosity of spirit that has provided the money for the Servery. I am, as ever, in awe of God and His people in these churches. Huge thanks to all those who are now working on the money for chairs. To be clear, this money will be ring-fenced for these purposes only and we are still applying for grants for the shortfall in the build but this shortfall drops every time grants come in. We still have the option of an interest free loan from the diocese.

I would also like to be clear on what we will have once the builders are done:-

- Raised floor with underfloor heating
- Welcome deck at street level
- Disabled access
- Rewiring and Audio Visual feeds
- Glass entrance doors
- Moved screen and new storage area
- Parish Office to be moved into Vestry
- Improvement of current lighting and capacity to renew it completely.
- SERVERY Including dishwasher, cooker, fridge and crockery. (Did I mention how pleased I am about this?)

I am now turning to the issue of what equipment will be needed. Over the next couple of weeks I will publish a list of items that we will need with guide prices. It may be that some people will want to contribute towards a specific item. It may also be an idea for a homegroup to club together on something. However you wish to respond, the list will make it clear how, where and to whom. This is the final push toward re-opening – it really is happening! Bless you all and keep those events going.
